

acute systemic toxicity.

Dear Director Stokes,

I am encouraged by the recent reviews that assert that In-Vitrio testing be come a replacement for the despicable practce of the LD50 testing proceeedures. In this day and age, with our committments to Humanities, freedom and respect for diversity, we (and you) should be doing our utmost to help protect other species on this Planet, no Killing them under the guise of Scientific researcc.

Disgraceful111

PLEASE DO ALL YOU CAN AND SUPPORT THE iNVITRIO METHOD
ALTERNATIVE.

Thank You

Alan D Tirapani
